

>> Saddle seats with seamless upholstery

Seamless upholstery ensures that bacteria cannot accumulate on the seat. Additionally, Stamskin has an antimicrobial and anti stain finish. It is urine-, blood-, sweat-, mould-, and waterproof.

>> Sit-stand stools

Sit-stand stools are ideal for alternating easily between standing and sitting or for workplaces where there is little leg room. All models are available with high or low gas lift. This way you will always have a sit-stand stool suitable for your workplace and for you!

With this foot control you can easily adjust the height of the saddle chair and keep both hands free for your work.

The polyurethane seat is easy to clean and very durable.

>> Score saddle chairs and sit-stand stools...
...to stand whilst sitting and sit whilst standing!

>> Jumper seamless

Saddle chair upholstered in Seamless Stamskin. Can be delivered with high or low gas lift.

>> Jumper/Amazone backrest seamless

Saddle chair with backrest upholstered in seamless stamskin. Adjustable back height and back angle as standard. Can be delivered with high or low gas lift.

>> Sit-stand stool 2232

Sit-stand stool 2232 is delivered with an adjustable sitting angle as standard. Equipped with an aluminium five star base ø 70 cm (also available in black).

Options:

- brake-loaded castors or trumpet glides
- ESD safe version

>> Sit-stand stool 232

Sit-stand stool 232 is delivered with an adjustable sitting angle as standard. Equipped with a steel base (also available in grey).

Options:

- brake loaded castors or trumpet glides

>> Amazone seamless

Has a narrower seat than the Jumper. Ideal for smaller people. Can be delivered with high or low gas lift.

Standard:

- gas lift height adjustment
- fixed sitting angle
- aluminium five star base ø 50 cm
- soft PU swivel castors (for hard surface floors)

Upholstery:

- stamskin

Options:

- adjustable sitting angle
- aluminium five star base ø 70 cm (also available in black)
- several types of castors
- foot control
- foot ring ø 45cm

The saddle seats with seamless upholstery are suitable for work places with strict rules for hygiene. Also the smooth cover of the gaslift contributes to the requirements of hygiene.

>> Sit-stand stool Steady

Sit-stand stool Steady is delivered with an adjustable sitting angle as standard. In the lower position it can easily be used as a stool, benefitting from the integrated foot rest. In the higher position, the seat can be tilted forward to create a comfortable sit-stand perch. The steel base is foldable.

Your Score dealer:

>> Jolly

Sit-stand stool with a seat shaped like a bicycle saddle and a fixed sitting angle. Equipped with ø 65 mm swivel castors as standard.

Options:

- brake loaded castors or trumpet glides
- foot-operated height adjustment.

>> Score saddle chairs and sit-stand stools

To stand whilst sitting...
... and sit whilst standing!

>> Jumper

The 'Jumper' saddle chair has an ergonomically shaped saddle seat, ensuring a healthy back posture. The design of the five star base with the swivel castors ensures mobility and allows the user to get close to the client or work place.

>> Amazone

The 'Amazone' is the narrower version of the 'Jumper' saddle seat. Ideal for smaller people. Both the 'Jumper' and the 'Amazone' can be equipped with foot-operated height adjustment. This foot control enables you to change the height of the chair whilst keeping both hands free for your work.

>> Working whilst standing, is that healthy?

>> Why use a Score saddle chair?

Experience a Score saddle chair. It works. Sitting was never more relaxed than on a saddle chair. On a Score saddle chair, the pelvis is tilted forwards. This ensures a natural position of the spinal column and reduces tension in the back muscles. This healthy posture is less tiring and you can continue to work in a more relaxed position. With your feet placed firmly on the floor, you can easily move sideways and around your work place, taking a folder from a cabinet or placing instruments on a work station. When you use a Score saddle chair, this can all be achieved without getting up and down continuously. On a saddle chair, you will sit higher than on a normal chair (the optimum position is when you place the saddle chair as high as possible with your feet placed firmly on the floor). This saddle chair will enable you to have meetings whilst standing upright or working at a high desk. It will minimise the pressure on your legs, ensure a good back posture, a more relaxed breathing pattern and increased mobility: all benefits of this Score saddle chair. Because people are different heights, Score saddle chairs can be delivered with a choice of low or high gas lift.

>> Backrest

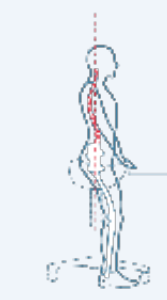

As standard, a saddle chair is delivered without a backrest, but sometimes it is good to rest a little and support the lower back (whilst still ensuring a good, upright, posture). For this reason, we can deliver the Score saddle seat with a backrest for those moments of relaxation in your busy schedule.

>> Armrests

For some activities it is desirable to support your arms. That is why we have developed armrests specifically suitable for the Score saddle chairs.

>> Jumper and Amazone

The Jumper has a wider seat than the Amazone. The Amazone is especially suitable for people with narrower hips or more developed thighs. Experience the comfort of the Score saddle chair and ask your local dealer for a trial.

>> With all our Saddle chairs you have the following options:

- small or large diameter five star base
- choice of gas lift height range
- selection of upholstery types and specifications
- different styles of castor

>> Advantages

- anatomically shaped for a relaxed back posture
- ergonomic sitting posture trains the back muscles
- improved back posture can reduce complaints of the lower back
- saddle shape encourages healthy open-angle pelvis
- sitting pressure is evenly distributed over the lower body
- you can sit closer to your desk / bench / client than in an ordinary chair
- promotes movement and active sitting
- can be used as a sit-stand stool for a high work surface
- provides maximum mobility because of the swivel castors
- users can alternate easily between standing and sitting

With this clever clamp, you can draw the chair to you whilst sitting down.

>> Jumper with backrest

Saddle chair with backrest. Adjustable back height and back angle are standard features. Can be delivered with high or low gas lift.

>> Jumper foot control

Saddle chair with foot control. Can be delivered with high or low gas lift.

With this foot control you can easily adjust the height of the saddle chair and keep both hands free for your work.

>> Amazone with backrest

Saddle chair with backrest. Adjustable back height and back angle as standard. Can be delivered with high or low gas lift.

>> Amazone foot control

Saddle chair with foot control. You can easily adjust the height of the saddle chair whilst keeping your hands clean and available for your work. Can be delivered with high or low gas lift.

>> Jumper

Saddle chair with gas lift height adjustment and fixed sitting angle. The Jumper has an aluminium five star base ø 50 cm and is equipped with swivel castors as standard. Can be delivered with high or low gas lift.

Upholstery:

- black leatherette, Stamskin, Inno-X

Options:

- adjustable sitting angle
- aluminium five star base ø 70 cm (also available in black)
- various castor types
- foot-operated height adjustment
- foot ring ø 45cm

>> Barrage

Saddle chair with backrest, including adjustable back height and back angle. Supplied with Type 8 armrests (height, width, depth and angle adjustable). Equipped with ø 70 cm five star base as standard.

>> Amazone

The Amazone has a narrower seat than the Jumper. Ideal for smaller people. Saddle chair with a gas lift height adjustment and fixed sitting angle. The Amazone has an aluminium five star base ø 50 cm and is standard equipped with swivel castors. Can be delivered with high or low gas lift.

Upholstery:

- black leatherette, Stamskin, Inno-X or PU

Optional:

- adjustable sitting angle
- aluminium five star base ø 70 cm (also available in black)
- several types of castor
- foot control
- foot ring ø 45cm

>> Amazone PU

Amazone with PU saddle. PU can withstand many chemical substances and is easy to clean.
