

>> Jumper & Amazone

Showpieces of the Score sit-stand range

Leatherette

Available in various leatherette colours that are urine and blood proof (DIN 32763). Easy to clean with a damp cloth.

Polyurethane (PU)

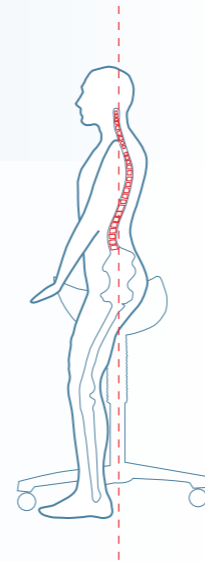

A very strong durable material, that is easy to clean and resists most chemical substances. PU is eminently suited to heavy duty in various workplaces such as: laboratories and industrial environments.

>> Jumper PU

Eminently suitable in a demanding environment.

- PU seat
- adjustable sitting angle
- height range c. 64-90 cm
- work surface height c. 80-100 cm

New AMAZONE with narrower seat

Jumper Amazone

>> Jumper Stainless Steel

For work environments where hygiene requirements are strict

- PU seat
- unique waterproof gaslift
- base stainless steel 304
- adjustable sitting angle
- height range c. 64-90 cm
- work surface height c. 80-100 cm

Healthy sitting posture

The shape of the saddle seat ensures that the pelvis tilts into the right position. This promotes the natural S curve of the spinal column. Your posture will be both more comfortable and more healthy!

- Anatomically shaped saddle seat that promotes a healthy back posture
- For workplaces that require frequent changes from standing to sitting
- Suitable for environments where there is too little or no leg space
- Makes it possible to sit very close to a patient, client or worktop
- Modern, exclusive design with a wide range of options

# Jumper & Amazone

Much of our life is spent seated, whether at work, at home or in the car. However, when we sit, we often adopt a static position for extended periods. This can cause back, neck, and shoulder complaints which may lead to sickness and discomfort. The right chair or sit-stand-stool to promote an ergonomic and healthy sitting posture will prevent this. However, some work environments and activities are not suitable for an ordinary chair. For example, workplaces which require frequently alternating sitting and standing postures or workstations where there is little or no leg room. Amazone and Jumper are the viable, healthy and practical solution. The "Amazone" is Score's latest introduction to the sit stand stool market. It has a narrower version of the Jumper seat. Both models feature an anatomically shaped saddle that allows the pelvis to tilt into the right position for a healthy, balanced and relaxed back posture. Spreading the legs in this way also enhances stability and enables users to get even closer to their work. Sitting on either Jumper or Amazone helps users to be more comfortable and, more importantly, more healthy! Besides all this, the elegant, modern, design and exclusive range of options make these stools a real asset in any work place. In short: Ergonomics and design come together in the Score saddle-seats!!
