

Education Special

For many years, Score has produced and supplied working chairs and ergonomic accessories for a variety of work places, including the education sector. Our chairs and stools are exceptionally strong (5 or 10 year warranty), designed with ergonomics as a priority and available with various options. In particular, our saddle chairs encourage a comfortable back posture and pelvic angle.

Score has a suitable seating solution for every person.

Spirit Line

The Spirit Line is suitable for any project size and available in various options. These include a choice of beech or polyurethane seat and back construction. You can find more information on our website at www.scorenl.com.

Stools

There are many applications for stools that allow the user to alternate standing and sitting. This seat is available in beech, polyurethane or fully upholstered. Height adjustment is easy with a ring-shaped gas lift. There is also a choice of either steel or aluminium base.

Tabourets, 4 foot stool

Score stools can be specified with a choice of gas lift height range. The seat is available in beech, polyurethane or upholstered. The four foot support bars are each at a different height to suit all age groups. Stool bases can be supplied in any RAL-standard colour.

Zadelkrukken

The saddle chairs encourage a healthy, open-pelvis sitting position. Score has two saddle chair variants, Amazone, with a smaller seat, and Jumper, with a wider seat. The saddle chairs can be provided with a back rest, armrests and foot-operated height control. The Balance mechanism allows small movements whilst sitting to help the user improve core stability.

Pico

The Pico has been developed specifically for nursery schools. It permits the teacher to sit at the same level as the children. Attractive design combined with rugged construction.

Tip:

Did you know that Score also provides a complete range of height-adjustable mounting systems for interactive white boards and touch screens?

- On wheels or stand, electrically height adjustable
- Wall mounted, electrically height adjustable
- You can also convert your current black or white board system to electrical height adjustment

Office Line

Score offers a large portfolio of office chairs to accommodate all shapes and sizes of user, including those outside the dimensional norms. The largest chair has a maximum capacity of 250kg (39 stone). Please have a look at our website for numerous possibilities.
