

SCORE®

Score, seats to suit!

Pricelist 2013

Score, seats to suit!

In this pricelist you find a completely renewed assortment, clear differences are a.o. a flat backbar on most models, through which stability of the backrest improves and the design is also a lot nicer. Also you will find a Balance option on the saddle seats Jumper, Amazone and Jolly, that provides a multidirectional movement. This improves the seating comfort tremendously. We also have a new supplier for our fabrics. Wool and Trevira are of a higher quality and more hardwearing instead of Dralon. On our website www.scorenl.com you will find the most actual information.

Choosing the right chair

The right chair for you depends on your work environment, personal preferences and budget. First of all a good chair should be able to swivel. It is also of importance that the height of the seat, backrest, armrests and footrest are adjustable. The base ought to have at least 5 feet and the seat should be virtually flat, with a light, evenly curved backrest to provide support to the lumbar region. On this page we take a closer look at the provisions which are essential to create a proper sitting position.

Footrests

It is important that the lower leg makes an angle of at least 90° towards the upper leg. You need a footrest if your feet do not touch the ground. There are several possibilities, a stand alone footrest on the ground or a footing or footboard fixed on a chair.

Armrests

Since the arms represent about 10% of our total body weight, it is important that they are properly supported. Where the work situation allows, armrests are always recommended. Score armrests are short so that the chair can be moved very close to the work surface. Nearly all Score armrests can be adjusted in height and width.

Upholstery

The choice of upholstery depends to a large extent on your work environment. An upholstered chair is the most comfortable and is preferred wherever possible. If you work in a dusty or dirty environment Score offers a choice in Polyurethane, Beech or Leatherette. Score's choice in upholstery is Trevira, Wool, Leatherette and Stamskin. The colours and characteristics of all types of upholstery and materials are to be found in the back of the catalogue. We can also upholster the chair with fabrics of your choice, supplied by you.

Castors

For safety reasons, mobile chairs are supplied with brake unloaded swivel castors. When you stand up, the chair does not roll away. Chairs with brake loaded swivel castors lock when you sit on them. For hard floors we recommend polyurethane (soft) castors. Hard castors can be used on soft floors such as carpet.

ESD/Cleanroom

The friction of plastic castors, on synthetic floor coverings generates static electricity. With an ordinary chair, this may be discharged through the product or user, who experiences small but unpleasant shocks. ESD chairs and related products are made completely conductive, which means the static electricity is discharged straight to the floor. ESD chairs are therefore indispensable in the production and assembly of electronic components, as static discharge on components might lead to considerable damages. For cleanroom areas the cleanroom chairs of Score are the perfect solution! The chairs are available in Leatherette or Polyurethane and are also ESD protected.

Seat slider

For people with long legs, a flat seat is very easy to provide with a seat slider. The seat slider will enlarge the seat depth with max. 7 cm.

Ergonomics

Several chairs can be provided with ergonomic accessories such as an adjustable lumbar support, headrest, etc. To promote a good and healthy posture at your desk, Score offers a choice in several ergonomic solutions, such as monitor supports, CPU holders, laptop supports, etc. New in the assortment is a range of Trolleys for Digital Schoolboards and Flatscreens.

Score, seats to suit!

A good and healthy sitting position is less tiring and promotes concentration and better performance. A superior workchair is an investment that pays for itself over and over again, especially when you consider that good posture helps to prevent back complaints and RSI. A high quality chair from Score need cost no more than one day's sick leave!

Score stands for

- High quality industrial design, winner of many national and international awards
- Ergonomic design in accordance with Dutch NEN EN-1335 standards
- Complete range: the best solution for every workplace
- Custom made solutions available because of our own Research & Development department and in-house production facilities
- ISO 9001: 2000 certified

At the moment Score is working on product development according to the Cradle-to-Cradle principal, with which we also involve our suppliers to help us reaching our environmental goals. Score is also working on ISO-14001 certification.

Fast Delivery Program

New, fast delivery program, shipment in 2 working days, for the exact conditions, please contact our Export Department.

Guarantee

Score chairs are produced according to high quality standards and long lasting materials, with:

- Life-long guarantee on the gas lift
- 5-year guarantee on all metal parts based on 8 hours per day
- 2-year guarantee on upholstery based on 8 hours per day

Delivery conditions

Standard conditions of delivery and payment issued by the 'Metaalunie' (Dutch Organisation of Entrepreneurs in Small and Medium-Sized Businesses in the Metalworking and Mechanical Engineering Industry), referred to as the METAALUNIE CONDITIONS and previously as the SMECOMA CONDITIONS, filed at the Registry of the District Court in Rotterdam on 1 January 2001. Publication of the Metaalunie, P.O. Box 2600, 3430 GA Nieuwegein.

Prices

Prices listed are suggested retail prices, ex VAT (incoterm 2000)
Prices are without armrests except where otherwise indicated

Orders

Should be submitted in writing or by e-mail

Delivery

Dutch 'Metaalunie' conditions of sale apply to all deliveries, these are available on request

Dealers

Score sells through resellers only

Height adjustment

The mentioned measurements can deviate from reality

Measurements

The mentioned measurements are in centimetres. By application of several components the real measurements can deviate from the mentioned measurements. For exact information please contact us.

Packaging

All products are appropriately packed in cardboard boxes. The chairs are packed knocked down in boxes.

Product Modification

Modifications as a result of product improvement are tacitly carried out.

Complaints

Complaints can only be handled if reported in writing, within 48 hours after delivery.

NB: Transport damage must be mentioned on the transportdocument.

Property Reservation

The property is reserved until all provided and still to provide matters with that possibly coherent activities, collecting charges, contractual fines and interest are entirely paid.

Client specific upholstery

In case of client specific upholstery, Score BV cannot be held responsible for guarantee, product quality and the adhesiveness of the upholstery.

Price modifications

Material prices are subject to change, therefore we preserve ourselves the right to amend our prices without notice.

Every effort has been made to ensure that all information is correct at the time of going to press.

Price and product specifications are subject to change without notice, errors and omissions excepted 2013.

Upholstery

The choice of upholstery depends to a large extent on your work environment. An upholstered chair is the most comfortable and is preferred wherever possible. If you work in a dusty or dirty environment Score offers a choice in Polyurethane, Beech or Leatherette. Score's choice in upholstery is Trevira, Wool, Leatherette and Stamskin. We can also upholster the chair with fabrics of your choice, supplied by you.

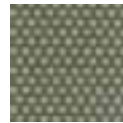

TREVIRA

Composition : 100% POLYESTER TREVIRA CS
 Weight : 340 gr/m²
 Light fastness : Scale 6 (blue scale) Xenotest
 Abrasion resistance: 100.000 (rubs) Martindale
 Cleaning washing :
